

# What about Sepistab ST™ 200?

---

Process Improvement  
and formulation stability

# Sepistab ST™ 200, a Versatile excipient for dry oral forms

**Sepistab ST™ 200**, with its unique starch composition, **features synergistic properties** of excellent flowability, binding and disintegrating power.

- Improves **the flow of powders**, a key point for direct compression or filling capsules
- Used as **adsorption** medium due to its porosity
- Makes it a **perfect fit** for all dry form applications
- Has an **anti capping action**

# Sepistab ST™ 200?

## Application & Formulation benefits

---

### Formulation benefits:

- **Improves the stability of active ingredients** sensitive to moisture due to its role as a moisture scavenger and its very low aw value (water activity).
- Can be used to obtain tablets with a greater hardness without compromising their rapid disintegration in the body,
