

## DuoCoat®

A superior gastro-resistant coating for rapid release in the ileocolonic region

### DuoCoat®: An Innovative EUDRAGIT® based system

DuoCoat® is a cutting-edge enteric technology that targets drug release in the ileocolonic region for accelerated concentration onset and minimal exposure to efflux transporters and gut microbiota. This unique dual-layer system achieves significantly faster release compared to conventional polymer coatings.

The gastro-resistant formulation remains intact through the stomach. Influx of fluid in the small intestine causes the inner layer to swell and rapidly dissolve the polymer coating.

### What makes DuoCoat® unique?

Reliable gastric protection

Accelerated release in the ileocolonic region

Minimise exposure to efflux transporters and gut microbiota

Target optimal absorption windows

Reduced inter- and intra-subject variability

Suitable for various drugs and dosage forms

Conventional manufacturing

Clinically proven

Patent protected technology

### Rapid and consistent results in humans

#### In vivo gamma scintigraphy study in 8 human subjects

Source: Liu F, Basit AW. J. Control Release. 147 (2010), 242-5

#### In vitro release in bio-relevant dynamic dissolution model

Source: Merchant et al. Int. J. of Pharm. 475 (2014) 585-591

In both studies, DuoCoat® released over twice as fast as the conventional enteric polymer and demonstrated less variable results. DuoCoat® is a proprietary enteric technology to target drug release in the ileocolonic region. DuoCoat® offers a unique opportunity for product differentiation, life-cycle management or patent protection.

DuoCoat® is a proprietary technology from Intract Pharma Ltd
